CAREER OVERVIEW

Innovative, always keen to make the product more exciting and interactive for the user, task driven professional with 2+ years of experience in the Front-End Web development with Agile methodology. Proficient in developing reusable UI components using ReactJs and JavaScript, writing and testing codes, integrating APIs, troubleshooting simple/complex issues and implementing new features based on user requirements.

WORK EXPERIENCE

Front End Developer

Tata Consultancy Services | March 2019 - present

Project : Safekeeping Application : Bank of Montreal

- Identified web-based user interactions and developed highly responsive reusable ReactJs components
- Translated designs & wireframes into high quality code using good code practices in JavaScript and ReactJs.
- Accomplished critical tasks in Project when onsite team disbursed.
- Integrated multiple Backend APIs (written by me earlier in same team) with front End with smooth performance and error handlings using Axios.
- Acquired client trust and appreciation by taking usability of feature in consideration and targeting even on small details.
- Actively presented weekly demos to the client through screen share and gathered changes in requirements if any.
- Collaborated and closely worked with Senior developers to achieve complex functionalities.
- Worked in the Agile development environment where implementation of feature was closely bound with time.
- Used lifecycle hooks and pure components at maximum instances to improve performance.
- Strengthened the Trade Settlement module containing multiple calculations of the trade settlement

PERSONAL SKILLS

- Comprehensive problem solving abilities

- Excellent Written and verbal communnication skill

- Love to accept challenges

- Hard Worker in both personal and proffessional life

- Team Player

PERSONAL DETAILS

- Marrital Status: unmarried

- Languages Known: English, hindi, Marathi

- Blood group: B+

HOBBIES

- Swimming

- Playing Vollyball

- Singing

Other Responsibilities
- Explored the AWS cloud services namely EC2, Dynamodb, Amplify, Api Gateway

DotNet Core API Developer

Tata Consultancy Services | Sep 2018 - Mar 2019

Project : Safekeeping Application : Bank of Montreal

- Used SwaggerHub for Api specifications
- Translated Swaggerhub designs into high Restful Services using good code practices in DotNet Core C#.
- Covered more than 90% code by writing Unit test cases
- Comprehensive Testing done by use of Postman tool.
- Got familier with AWS services like Dynamodb, Api Gateway etc and deployed those services on AWS cloud

Personal Project

Project : Online Food Ordering Web Application
- Built an online Food Ordering App using ReactJs which allows user to choose food items with simple and user-friendly interfaces, add it to cart, select quantity, create bill and save order in database.
- Used Axios to integrate backend API to store and retrieve list of food items, price etc from Firebase Database.
- Used Reusable component for all kind of input types.
- Validated form to capture correct data.

ACADEMIC BACKGROUND

Tatyasaheb Kore Institute of Engineering And Technology, Warananagar, India

Bachelor of Computer Science Engineering | June 2014 - May 2018.

- Grade : **First class with distinction**
